# International Journal of Physical Modelling in Geotechnics

Editorial Advisory Panel Chairman: Professor David Muir Wood, University of Dundee, UK

The *International Journal of Physical Modelling in Geotechnics (IJPMG)* aims to cover all areas of physical modelling and testing in geotechnics, such as centrifuge and laboratory floor modelling, shaking table tests, pressure chamber tests and geo-environmental experiments, but excluding full-scale field testing (such as trial embankments) unless they are part of a programme of modelling at different scales.

*IJPMG* serves as a regular communication forum for international networking among physical modellers in geotechnics and also serves for international communication between the numerical modelling and the physical modelling communities.

All relevant papers are carefully considered, vetted by a distinguished team of international experts and rapidly published. Full research papers, short communications and comprehensive review articles are published under the following subject categories

- physical modelling at any scale
- centrifuge, shaking table, pressure chamber testing
- geoenvironmental experiments
- instrumentation, apparatus, procedures
- simulation of construction processes
- scaling criteria

**Manuscripts can be submitted online at**

To discuss article ideas and full journal guidelines, please contact the Journals Development Editor, Rebecca Ratty, on + 44 (0) 20 7665 2241 or e-mail [rebecca.ratty@icepublishing.com](mailto:rebecca.ratty@icepublishing.com)

### Why publish with ICE Publishing?

**Access to ICE membership** – ICE Publishing, as the publishing arm of ICE, is the only publisher that brings you direct access to ICE's membership of 80,000.

**Visibility** – we also have thousands of readers who are not members of ICE, from corporations, to governments, to universities. Our journals are included in major engineering indexes and resources.

**Quality** – our journals' reputation for quality is unsurpassed, ensuring that the originality, authority and accuracy of your work will be fully recognised.

**Support** – if your paper is accepted, you will have a dedicated editorial contact who will handle all of your enquiries and provide you with guidance on writing your paper.

**Marketing** – our marketing team has extensive experience of working with author and librarian communities to make sure your work is seen by people who matter, including top academics, industry leaders, companies and institutions.
