

# ISSMGE YMPG ONLINE PUBLICATION

## CALL FOR CONTRIBUTIONS BY YOUNG ENGINEERS

### **AIM AND SCOPE**

The International Society of Soil Mechanics and Geotechnical Engineering (ISSMGE) Young Members Presidential Group (YMPG) has established an online publication to promote technical and professional contributions of young geotechnical engineers to the field of soil mechanics and geotechnical engineering. The online publication, hosted by GeoWorld, is also aimed at disseminating young member contributions across the ISSMGE international community.

Select papers from the online publication will be published in the Young Member Arena section of the ISSMGE bulletin. YMs from ISSMGE member societies are particularly encouraged to submit content.

The online publication will cover a range of contributions from various specializations within the broad field of Soil mechanics and geotechnical engineering. The content of the online publication must be authored or co-authored by young engineers, that is, those engineers whose age does not exceed 36 at the time of submission. Manuscripts submitted for publication will be peer-reviewed by at least 2 reviewers comprised of YMPG members, corresponding members, or more senior engineers and academicians. Young authors must be corresponding members of the YMPG to submit manuscripts for publication. Become a corresponding member today by signing up at: <https://groups.google.com/forum/#!forum/ympg-corresponding-members>

### **MANUSCRIPT SUBMISSION**

Manuscript reception is open year round. Publication formats include original research articles, technical notes and comments, case histories, book reviews, and summaries of published research. Please consult the attached template for guidelines on manuscript preparation and length limits. Manuscripts prepared according to the guidelines specified in the attached template should be emailed directly to [issmge.ymarena@gmail.com](mailto:issmge.ymarena@gmail.com).
